Primera revisión de paquetes a realizar (más allá de la funcionalidad, solo para que no rompan):

Paquetes no existentes. Revisión segura:

- vx-utils depende de gnome-icon-theme-full que no existe > Se elimina

- vx-dga-l-obkey-atajos-teclado depende de radiance-colors que no existe...es necesario? (en terceros)
- vx-dga-l-skel-usuarios:amd64 Depende on radiance-colors (en terceros)
- vx-dga-l-plymouth Depende de plymouth-theme-script, no existe. Ésto se usa aún o se hace de otra forma -> Se elimina de momento
- vx-dga-l-actions-explorador-archivos:amd64 Depende on exiftool, y no existe -> Hay que cambiarlo (on ambos proyectos) por libimage-exiftool-perl
- vx-dga-l-actions-explorador-archivos:amd64 Depende on udisks. Ojo, udisks no existe. Solo sirve para desmontar. Dado que el explorador lo hace bien, yo quitaría la action (menos actions) y el script
- vx-dga-l-conky:amd64 PreDepende on conky-manager. No existe
- vx-dga-l-scripts:amd64 Depende on pdftk -> Se ha añadido a utiles
- vx-dga-l-skel-usuarios:amd64 Depende on vx-dga-l-theme-icons-papirus (en terceros)
- vx-dga-l-migasfree-launcher:amd64. Hay que revisar la versión de vx y la base....
- vx-utils:amd64 Depende on python-support -> Se elimina

### #3 - 2019-09-15 17:04 - Nacho Sancho

Se añade la lista de paquetes en el repo desktop base para ir chequeando que todo está correcto (en cuanto a funcionalidad)  
 Notar que a diferencia del 14.04, el vx-dga-lmigasfree-client está en el caso de 18 en el repo-esencial

- numix-theme -> Ok, paquetes para la 18.04
- vx-dga-l-actions-explorador-archivos\_2.2-4\_all.deb
- vx-dga-l-apagado-automatiko\_2.1-1\_all.deb
- vx-dga-l-ca-certificates\_1.0-2\_all.deb

**#4 - 2019-09-17 08:51 - Nacho Sancho**

vx-dga-l-conky modificado. Se ha cambiado el tema y se ha hecho upgrade de la versión (al igual que dos ramas para el paquete)

**#5 - 2019-09-19 20:45 - Nacho Sancho**

- *Prioridad cambiado Alta por Urgente*

**#6 - 2019-09-26 12:04 - Nacho Sancho**

Resueltas las dependencias de los paquetes que bloqueaban una primera instalación.

A a espera de instalación de todos los paquetes  
Recordar que falta migasfree-launcher de actualizar.

Comprobar porque no se lanzan/ejecutan las fallas, al no tener asociada ninguna:

- No está en Equipos Cliente
  - No está en Prj-lubuntu14
  - No tiene etiqueta
- Ojo con éste tema!!! -> Por seguridad atributo excluído? [#1918](#)

**#7 - 2020-05-02 21:26 - Nacho Sancho**

- *Estado cambiado Abierta - Nueva por Cerrada*
